

SMRITI Retail OS™

The AI-Powered Business Operating System

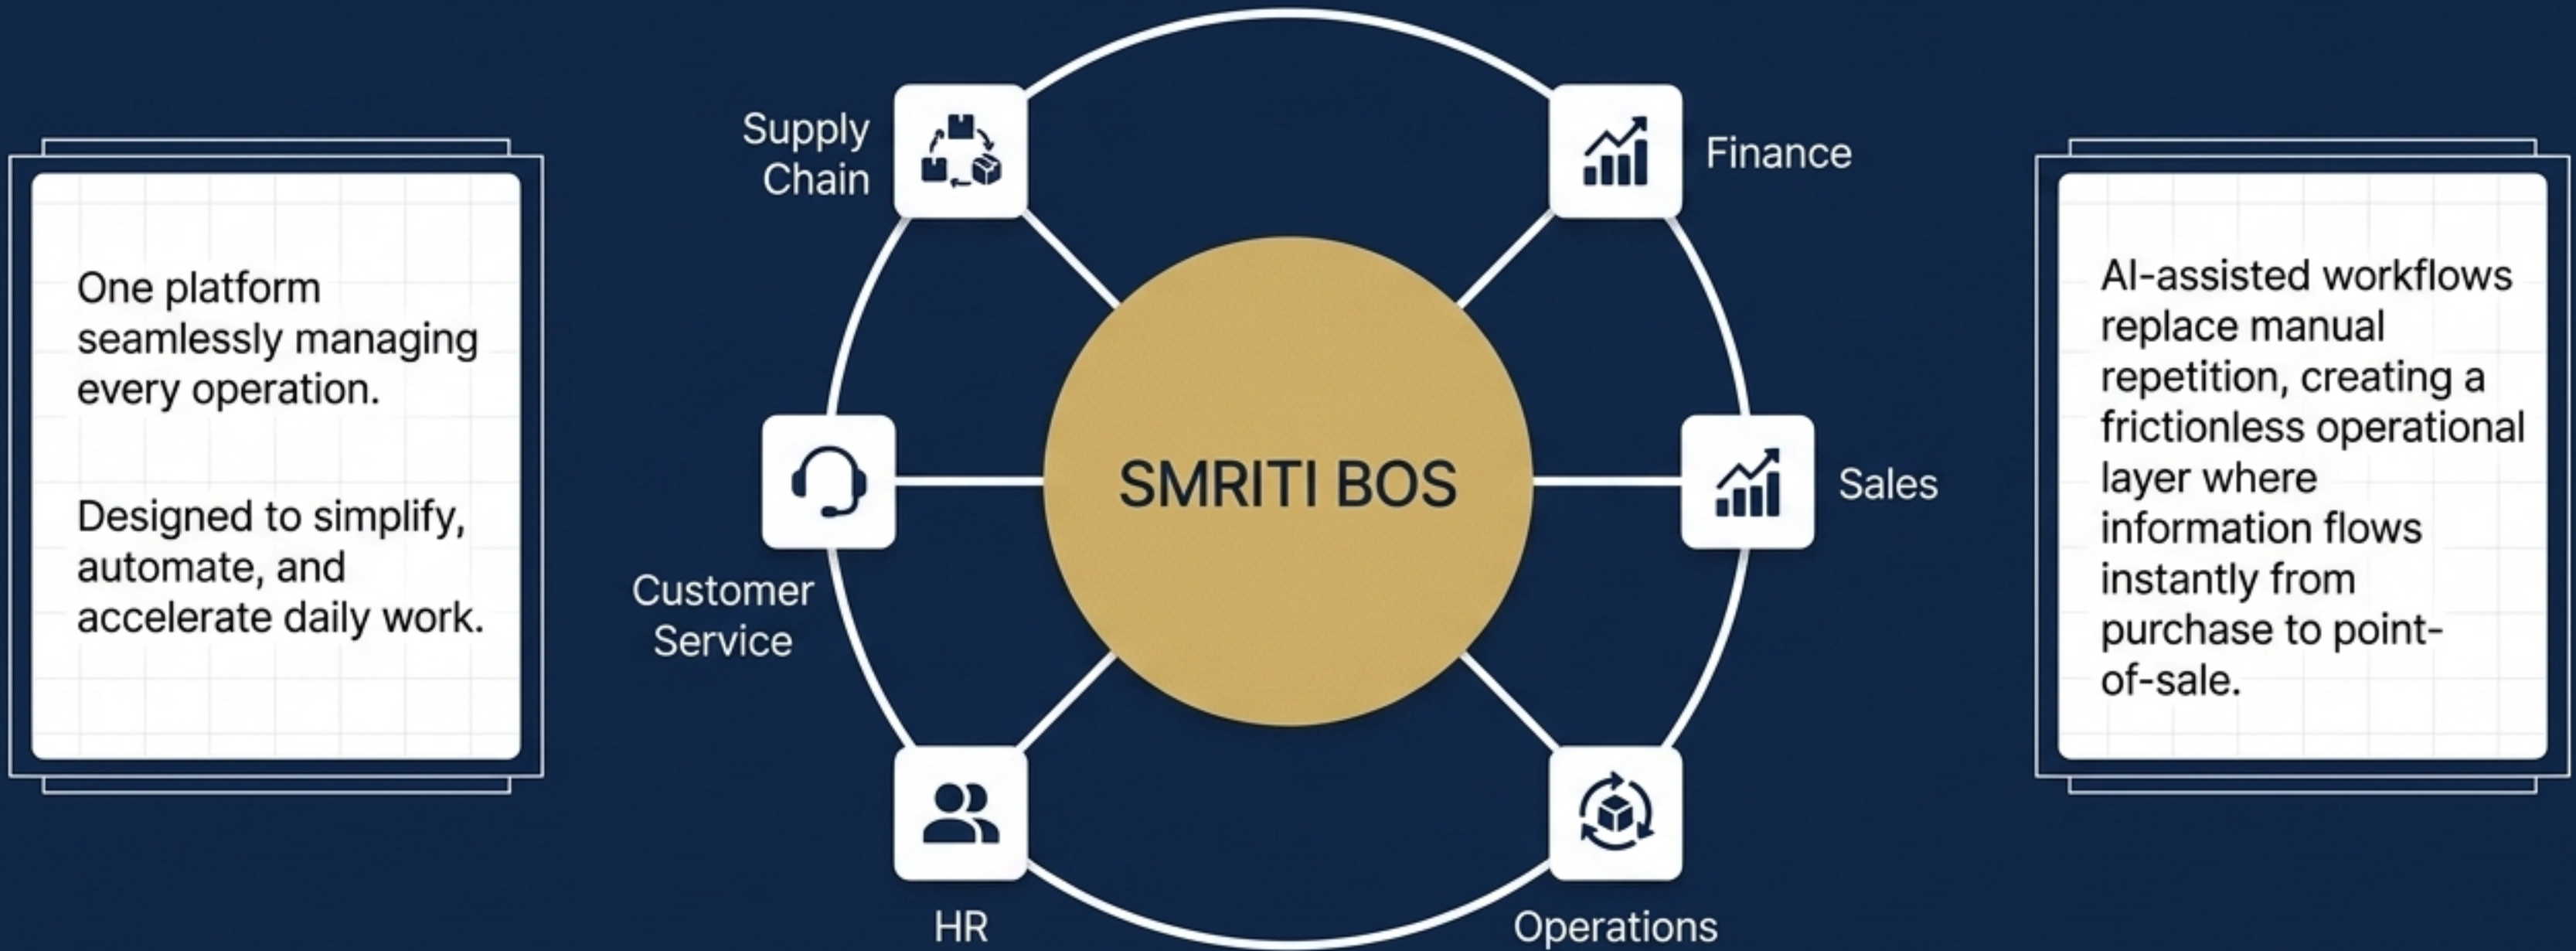

Always Decision-Ready.

The Fragmentation Tax: The Cost of Disconnected Systems

Growth is artificially capped when a business runs on multiple disconnected software tools rather than a single, unified source of truth.

A Unified Central Nervous System for the Enterprise

SMRITI is a complete Business Operating System—the intelligence layer that connects the warehouse, the storefront, and the executive suite.

The Anatomy of Control: Core Business Studios

Dashboard
(Real-time command)

Product Studio
(Catalog & variants)

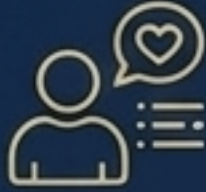

Purchase Studio
(Supplier orders)

Sales Studio
(Omnichannel retail)

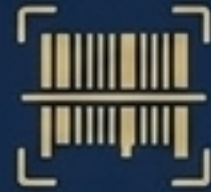

Inventory Studio
(Warehouse & tracking)

Customer Studio
(Loyalty & history)

Supplier Studio
(Vendor management)

Barcode & Label Studio
(Stable field IDs)

Reports & Analytics
(Business intelligence)

User & Role Management
(Security & access)

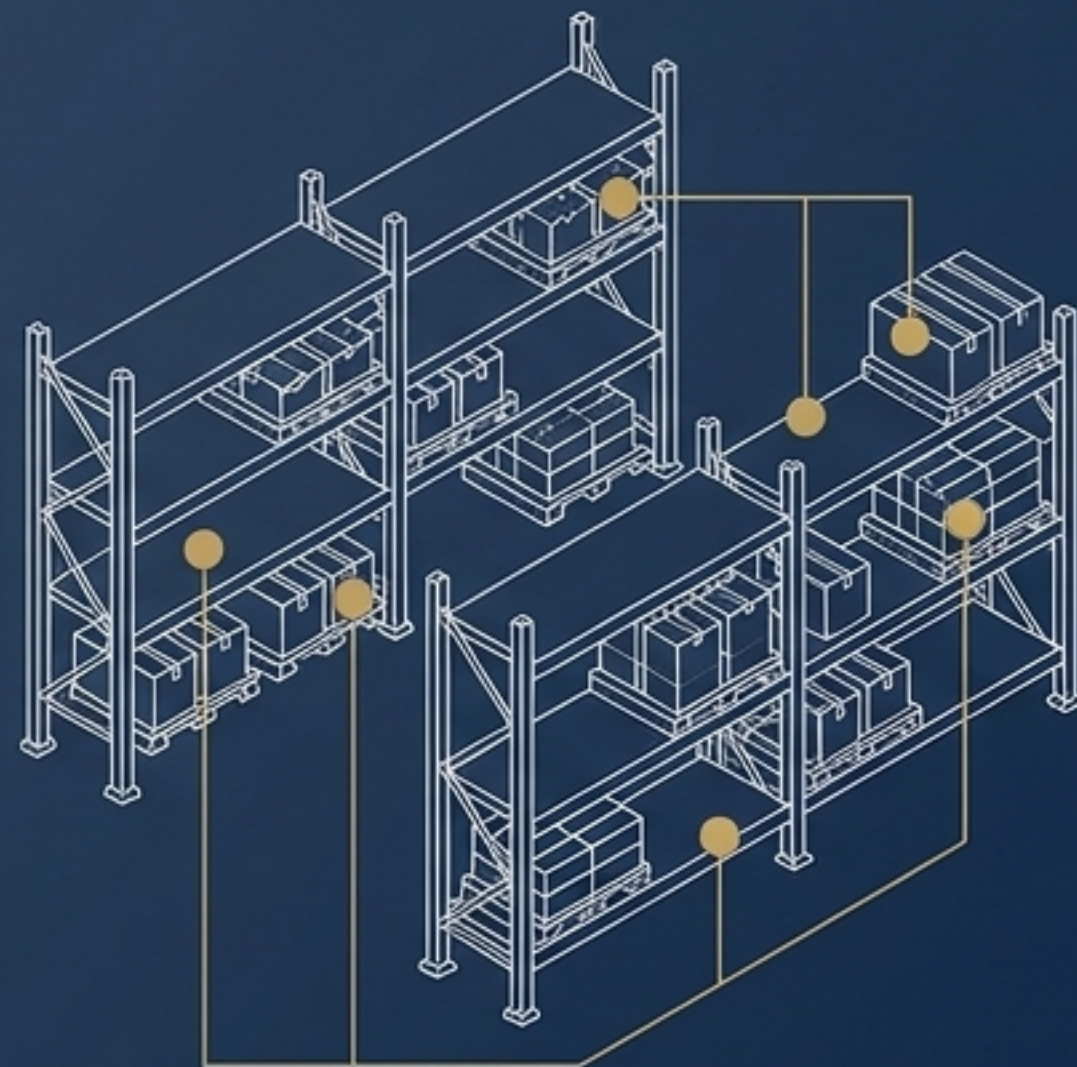

Settings & Configuration
(Business rules)

Frictionless Execution: From POS to Warehouse

Point of Sale: High-velocity billing with a keyboard-first terminal. Features include hold/recall bills, manager overrides, shift-lock protection, and built-in GST/e-Invoice compliance.

Inventory & Procurement: Intelligent tracking across multi-warehouse setups. Automated purchasing, instant barcode generation/scanning, and rigorous batch & expiry management.

Retail Intelligence That Explains Itself

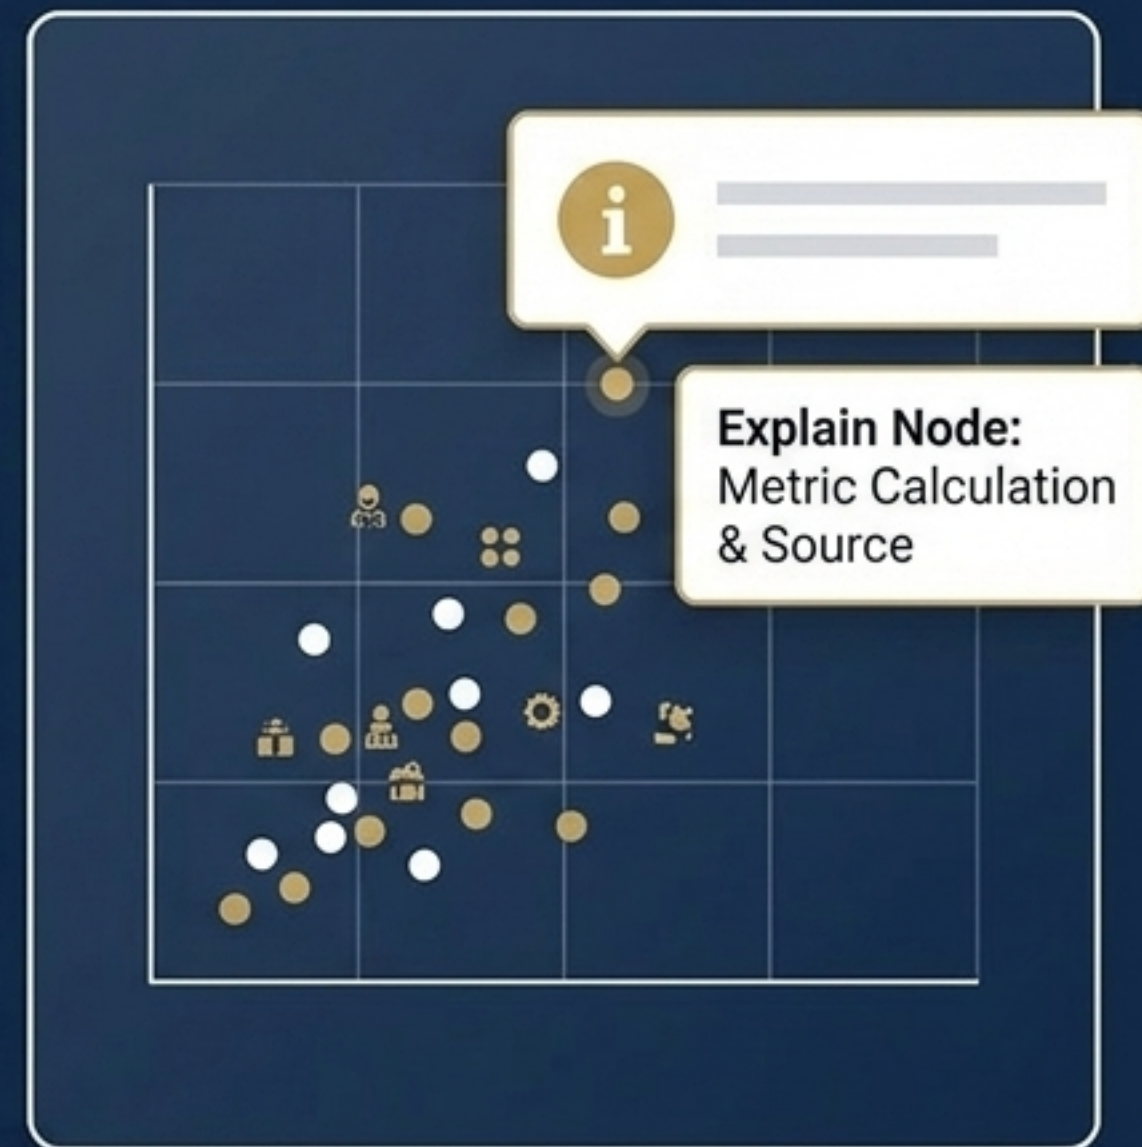

Predictive Tracking

Instantly identify fast-moving products and surface slow-moving dead stock before it impacts cash flow.

Customer Insights

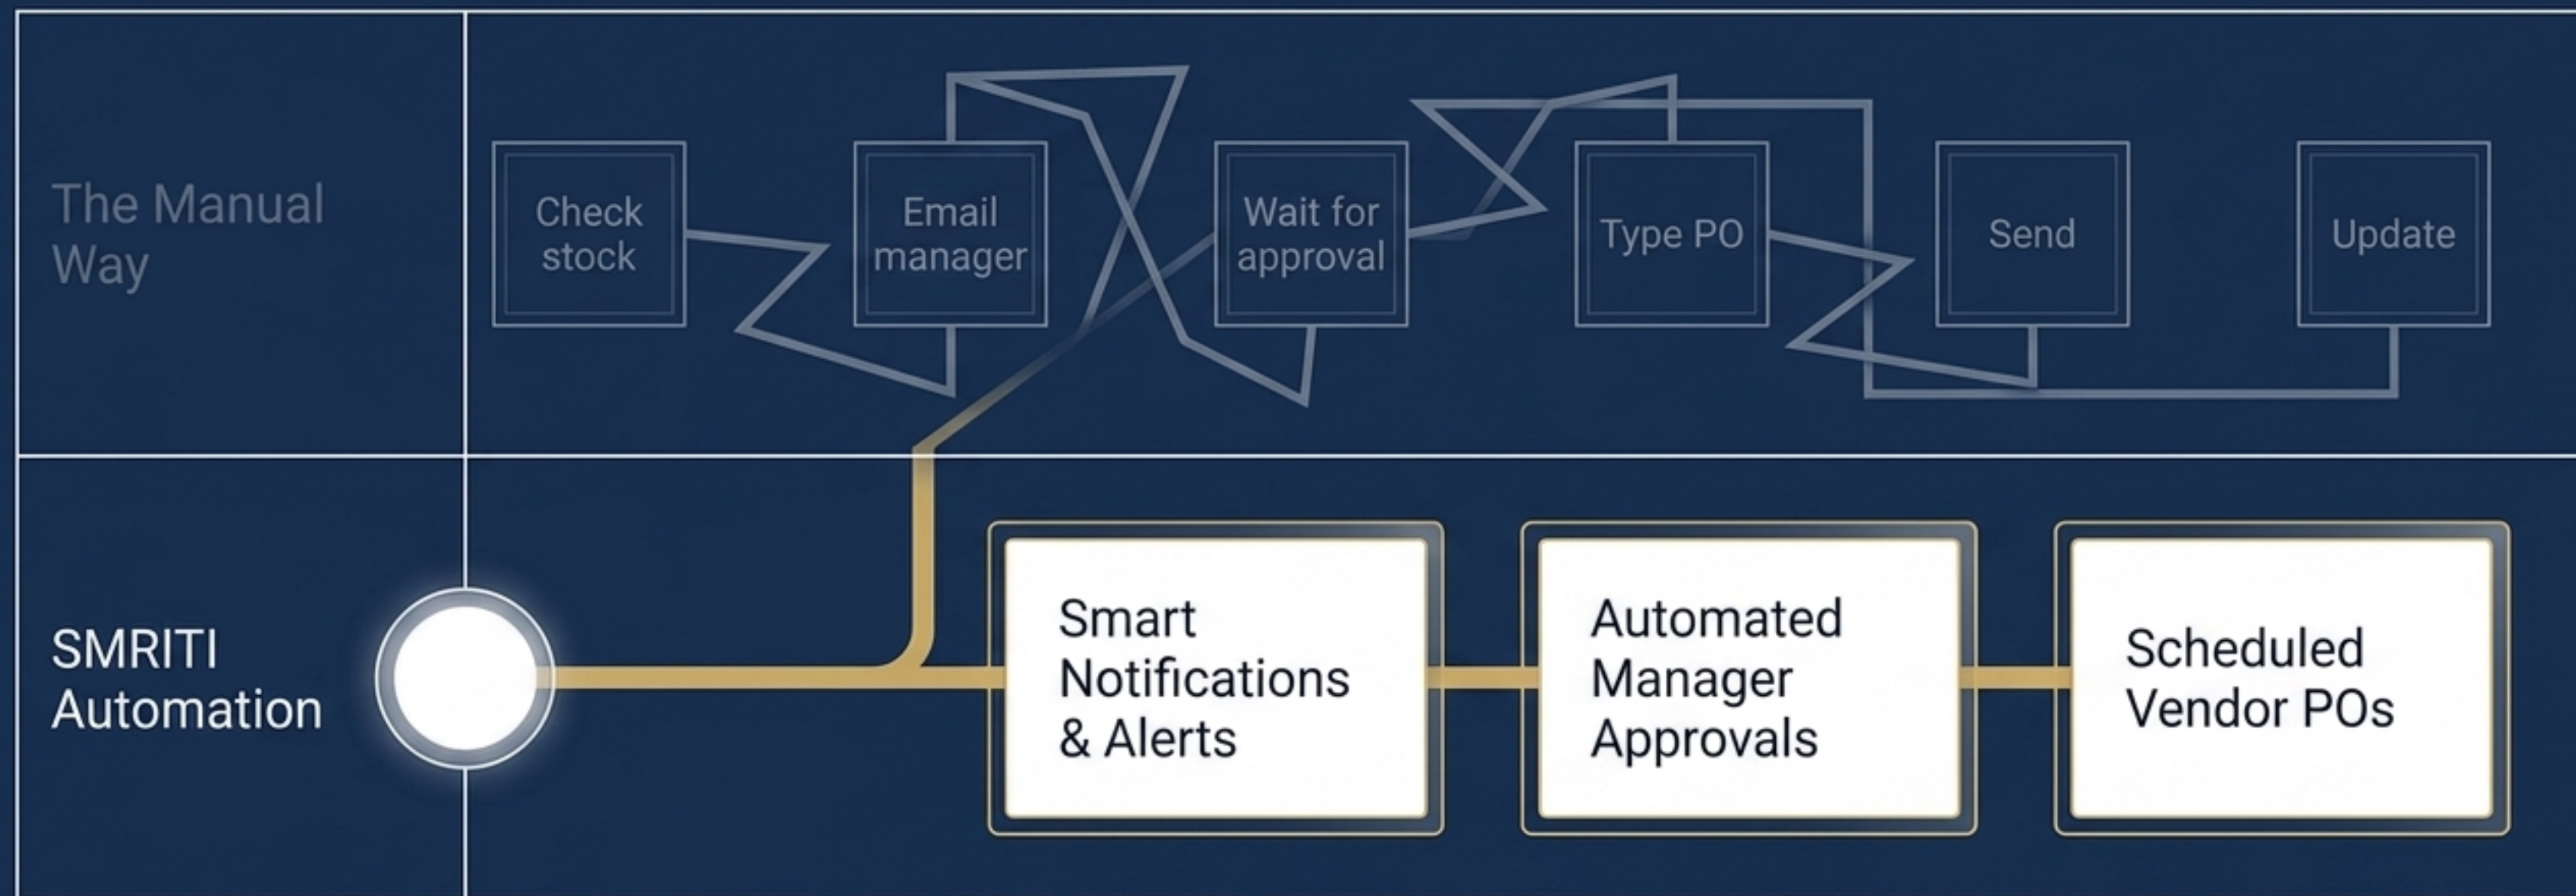

Map purchase history to loyalty rewards, predicting future buying trends.

The Formula Registry

Every computed metric features an Explain node, making complex business intelligence fully transparent and actionable.

Business Automation: Erasing the Friction

Custom business rules and secure, role-based permissions ensure that routine document workflows execute themselves, leaving human operators free to focus on growth.

Designed for Boundless Growth

Single Store & Multiple Stores:
Centralized management of franchise
operations.

Chain Retail & Manufacturing:
Unified control over production and retail
channels.

Wholesale & Distribution.

Party Stock Visibility — Seamlessly track
distributor inventory and channel health
directly through the unified ledger.

Enterprise-Grade Architecture

Resilience

Cloud-ready with Mobile-first experiences. Features an offline-capable Service Worker cache—if the internet drops, the store keeps billing.

Security

Unbreakable Audit Trails. Every critical action logs the user, timestamp, and precise before/after values to guarantee total accountability.

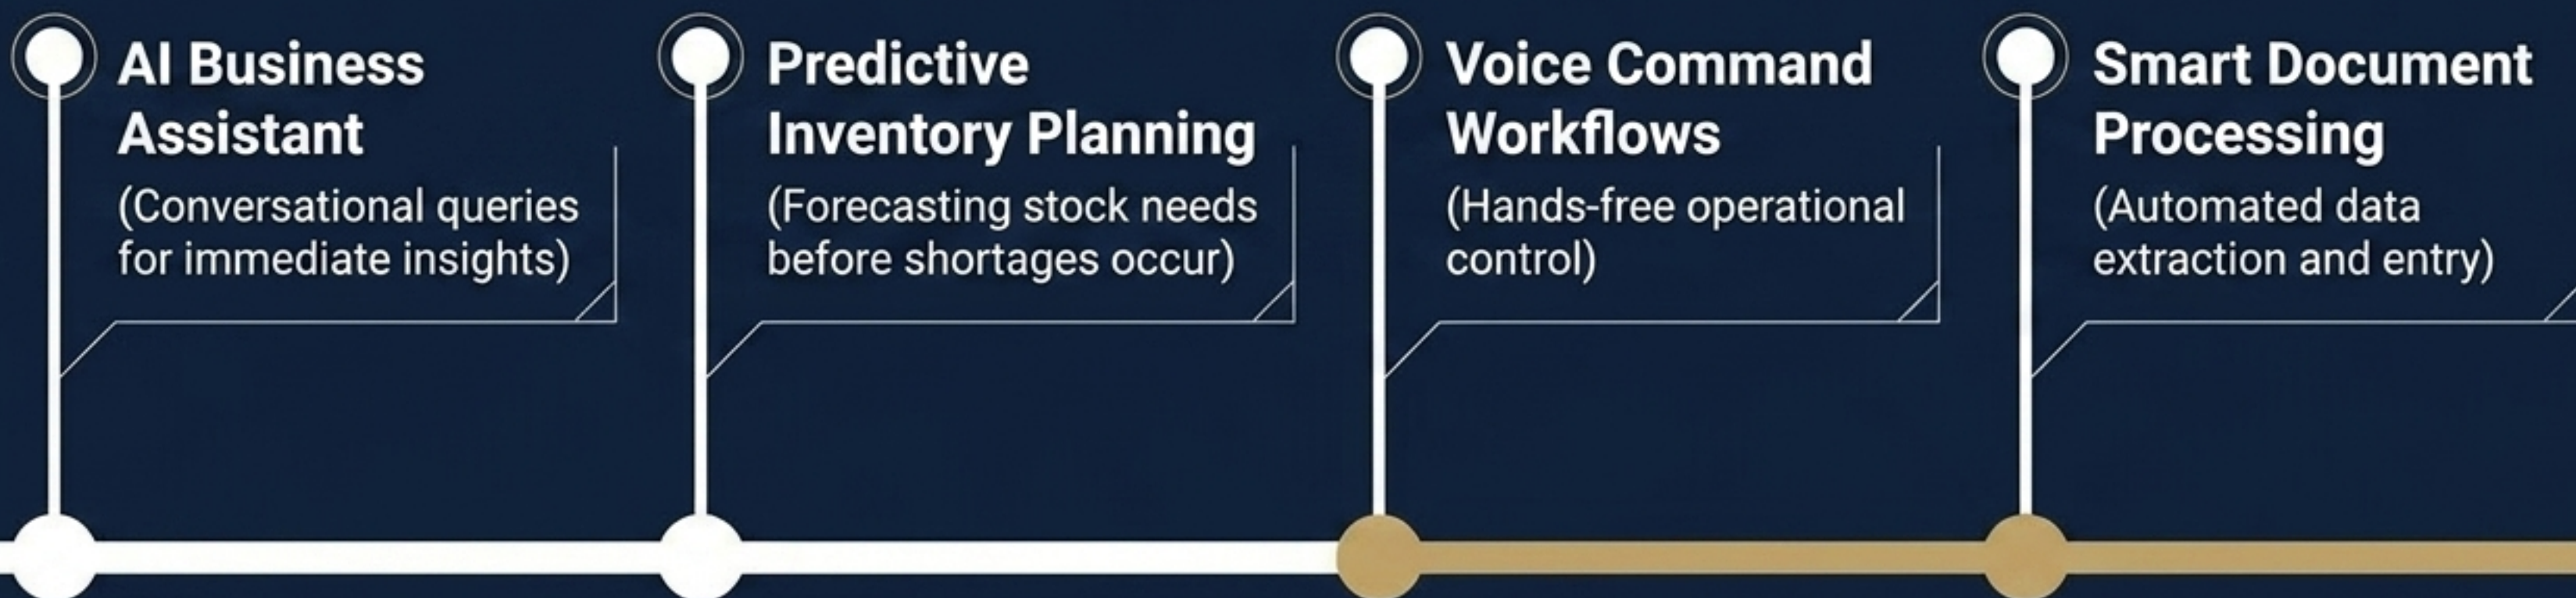

Adaptability

A high-performance, modular expansion design utilizing a Universal Field Explorer to instantly map and adapt to custom business requirements.

Why Visionary Businesses Choose SMRITI

	The Disconnected Business	The SMRITI Enterprise
Operations	Slow, error-prone manual entry.	✓ Simple to learn, lightning-fast automated execution.
Visibility	Blind spots across multi-store inventory.	✓ Complete real-time business visibility across all locations.
Decision Making	Guesswork based on delayed reports.	✓ Better decision-making powered by explainable AI and instant analytics.
Trajectory	Strains and breaks under growth.	✓ Effortlessly scalable architecture built for future expansion.

The Intelligence Horizon: Future Roadmap

A continuously expanding integration ecosystem driving toward a fully autonomous AI-first business architecture.

SMRITI – Light Begins with Learning.

Simple to Learn. Powerful to Grow.
